

FAQ on the expansion microphone

- Supported on Poly Studio X50 and Studio USB.
- One external microphone is supported.
- The only cabling supported is the cable that ships with it, which is 7.6m/25' long. Other cables are not available and custom cables are not supported.
- When a Trio/C60 is used with the X50 the external microphones are not supported
- Provides a Mute indicator
- Provides little additional audio pickup value in smaller rooms, like Huddle rooms.
- Recommended in larger rooms with the X50. The cameras of the X-family are not designed to be used in larger rooms so be cognizant of the recommendations of the total system room specifications. The recommended maximum room size is a width of 16' (4.9m) and depth of 14' (4.3m) from where the X-family is mounted. Sample room layout:

- When used with the X50 in reverberant, echoey rooms it will improve the X50 pick-up substantially.
- When the expansion microphone is used with the Studio USB and X50, system base microphones are not used for audio pickup.

2200-69631-001: Poly Expansion Microphone: Contains one analog Microphone Array and one 7.6m/25' RJ11 connection type cable. Compatible with Poly Studio X50 (w/out Trio/C60), Poly Studio USB and RP Debut.
